## INTRODUCTION

This catalogue represents standard items of equipment supplied by Rural Operations for use by Rural Fire Brigades. It is anticipated that this catalogue will be updated and reviewed annually.

The catalogue supersedes the RFS Equipment and Price List. It has been designed to assist with identification of items for ordering purposes. Stock codes, photos and a brief description of features are listed against each stock item and the cost, if any, to the brigade.

We would appreciate your views on any improvements for the next version of this catalogue. Please provide your comments on the feedback form located on the last page of this catalogue and fax it to the Manager Operational Support, Rural Operations on (07) 3247 8123.

Any enquiries regarding equipment should be directed to your Area Office in the first instance.

## HOW TO ORDER

The Brigade Secretary or delegate places orders using a Brigade Requisition Form (RF1).

The form is to be completed utilising the stock code to correctly identify each item being ordered. All requisitions for dress uniforms and personal issue equipment are to include the member's name and identification number along with a notation of 'initial issue' or 'replacement issue' as appropriate.

It is important that the entries on the form are **printed and clear** and that the form is signed by the Secretary or delegate, with the blue and yellow copy of the Brigade Requisition Form submitted to the Area Office.

Please refer to the Brigade Manual Business Rule D5.3 Brigade Equipment.

## ITEMS ON BACKORDER

Where an item is not currently held in stock within the Central Warehouse and is in the process of being ordered in, it is classified as being on 'backorder'. Items on backorder at the time of processing a Requisition Form will be forwarded to the Brigade as soon as the items become available for issue at the Central Warehouse.

## PROCESS FOR RECEIPT OF ITEMS

When the items are received by the nominated Brigade representative the package contents should be checked against the Despatch Copy packing slip. If any discrepancies are noted, contact should be promptly made with the **Central Warehouse** on the number detailed on the bottom of the packing slip. The Central Warehouse will provide information and take necessary steps to rectify the situation.

## RETURN

Where a Brigade receives an item of stock which is incorrectly provided or no longer required, the item should be returned to the **Area Office**.

In this section you will find information about ordering Floppy Hats and T Shirts.

## 2 PIECE COVERALLS - SELF MEASURING

### Measurement

**Chest** - Measure around the chest, below the arms and across the back.

**Waist** - Measurements should be taken over shirt at the waistline. Measure at position (height) trousers are normally worn.

**Inleg** - Take your most comfortable pair of correct length trousers and measure inside leg seam from crotch to hem.

### Directions

**Jacket** - Using table below, match your chest measurement with jacket size. Keep in mind the jackets are designed and made loose fitting.

**Trouser** - Use waist measurement first to determine size, then match your inleg measurement to determine if you require a Regular, Stout or Long (e.g. 92cm waist and 78cm inleg =92R).

**Note:** Generally the jacket size should correspond to the trouser size (i.e. a size 92 jacket will go with a size 92R, 92S, 89L or 94L trouser). In most cases the jacket and trouser size should not vary by more than 2 sizes. Your current coverall size is the best indication of the "set" size you require.

# SLIP-ON UNIT AND SPEED LOADER

In this section you will find information about slip-on units and speed loaders.

Slip-on units are supplied principally to Primary Producer Brigades (PPBs) and Rural Brigades and are strategically located around large Brigade areas. They are predominately used in support of private equipment where no appliances are available. The number of slip-on units for a Brigade is determined by risk and the capacity of the Brigade to operate the equipment in a safe manner in line with WH&S obligations.

The Brigade applies to the Rural Operations Area Office for a slip-on unit on the “Application for Slip-on Units Allocation” form found at D5.3.2 Apply for Slip-On Allocation in the Brigade Manual.

Brigades will be notified by the Rural Operations Area Office of the success or otherwise of their application. If unsuccessful the Brigade will be given the option to apply again in the next round or to go ahead with the acquisition at full cost to the Brigade. The Brigade will be provided with information on other ways of accessing funding to support this through the various funding grants and sponsorship opportunities available to Rural Fire Brigades.

Please note – Slip-On Units and Speedloaders remain the property of QFRS Rural Operations and the Brigade to which they were assigned. These units cannot be moved from one Brigade area to another without the prior written permission of the Area Office.

Slip-On Units and Speedloaders being moved will be transferred on the QFRS Rural Operations Asset Register. This register is used to assess risk when the Brigade is applying for further units. It is therefore imperative the Asset Register be correct.
